4500TH USAF HOSPITAL
LANGLEY AIR FORCE BASE, VIRGINIA

REPLY TO
ATTN OF: LS/Captain Roberts/3086

28 January 1965

SUBJECT: Indian Remains

TO: Mr. Harry H. Heyson
NASA West
Langley AFB, Virginia

Dear Mr. Heyson:

Please find the inclosed copy of a letter from the anthropologist at the Armed Forces Institute of Pathology and the micro-radiograph (micro x-ray) of a cross-section of the femoral shaft. This age estimate exceeds my wildest expectations, and I wonder if you ever got around to doing the Carbon 14 analysis that your people were talking about. If you do, I will be most interested in hearing about the results.

This has been an interesting interlude in laboratory routine, and I hope if you find any more remains or artifacts, you will be good enough to let me know.

Sincerely yours,

LLOYD ROBERTS
Capt., USAF MC
Chief, Laboratory Services
