TO: Langley Research Center  
Attn: Director, Systems Engineering and Operations

FROM: BX/Director of Facilities

SUBJECT: FY'76 Minor Construction Project, Addition to the Plant Safety Building, 1248, LaRC

REF: Memo to BX fr LaRC, dtd 11/28/75, Subj: Addition to Building 1248 for Occupational Health Facility FY'76 Minor Construction Project

Your request to substitute the Addition to the Dispensary Building 1149 in lieu of constructing an Addition to the Plant Safety Building 1248 as a candidate for funding in the FY 1976 Transition Period is approved. It is our understanding that LaRC has determined that the Construction of this addition would more efficiently meet the requirements of the Center than the Construction of the proposed FY 1976 subject project.

It is also understood that the addition to Building 1149 will be a two story structure, 5,000 square feet, and the construction will be concrete masonry and brick similar to the existing building. This addition will not exceed $200,000 in any event. The proposed addition to Building 1149 will meet the objectives of the original project and will also provide space for housing the Offices of Chief Counsel, Equal Opportunity Programs, Patent Counsel, and the Technology Utilization and Applications Programs. In addition, this proposed project will permit a more efficient utilization of existing space at the center and make some trailers available for disposal.
Facility Planning and Design Funds in the amount of $10,000 will be made available to LaRC for the design of the Addition to the Dispensary Building 1149 by separate action. Please keep us advised concerning the cost and schedule of this project.
