RE: Lunar Excursion Module Simulator
DHR file # 5475-HT

Dear Mr. Peterson:

Thank you for your letter informing the Department of Historic Resources of the proposed plans for the refurbishment and preservation of the Lunar Excursion Module Simulator. We concur that the undertaking is a "Category B" undertaking pursuant to the National Programmatic Agreement.

We are interested in the education program you have developed with the Virginia Air and Space Museum in Hampton, Virginia for the treatment and interpretation of this important landmark. It appears to be an excellent program and we commend your efforts. If we can be of any assistance throughout the process, please feel free to contact this office. We look forward to reviewing the project in NASA's summary of annual activities.

Sincerely,

H. Bryan Mitchell
Deputy State Historic Preservation Officer

cc: Advisory Council on Historic Preservation
