Langley Field, Va.,
September 30, 1943.

Mr. Stack—Don't forget that the stop order would be effective about October.

From LMAL
To NACA

Subject: Contract NAW-2049 - Supplemental Agreement No. 1 - Scale equipment for 16-Foot Tunnel, Langley Field, Virginia.

Reference: LMAL telephone conversation with Toledo Scale Company September 27, 1943.

1. Members of this Laboratory's staff have been reviewing the scale needs of the 16-Foot Tunnel and it appears that the equipment being furnished under the subject contract, duplicating the AAL equipment, will not be satisfactory for our needs because of the scale ranges.

2. In view of above, it was deemed advisable to stop the manufacture of the scale equipment until it could be determined with greater certainty the proper scale ranges that would be required.

3. Accordingly, on the morning of September 27, 1943 the contractor was issued a telephonic stop order on the equipment being manufactured for this Laboratory. The contractor stated the stop order was satisfactory to him as very little work had been done on the equipment for this Laboratory.

4. In view of the above it is recommended that a confirmation stop order be issued to the contractor by your office effective at the close of work on September 27, 1943.

Sherwood L. Butler,
Procurement Officer.
