Additional information in support of a promotion request for Mrs. Helen H. Willey

The Position Record for Mrs. Helen H. Willey, in Factor IV, states that she has prepared a manual which describes the procedures for the reduction of wind-tunnel data obtained in the 8-foot transonic pressure tunnel. A copy of this manual is enclosed with this memorandum. The manual reflects the most recent updating of the procedures which are to be followed in handling wind tunnel test data using the latest data acquisition system. The manual also includes the instructions for computing these data utilizing the newest machine computers. This manual is also applicable for use in connection with the other facilities in the 8-Foot Tunnels Branch.
